

IC3K 2015::European Project Space

Dear Loc Nguyen,

If you are or were related to a European research project this may be of interest to you.

I would like to invite you to participate in a new satellite event that we are trying to organize in conjunction with the IC3K 2015 the European Project Space (EPS). We intend it to be a forum to gather research groups and companies that are, or were, involved in European R&D projects, and need to disseminate results, either at oral demonstration sessions, at a technical exhibition or at a discussion panel, or any combination thereof. We also envisage the EPS as a way to stimulate networking amongst potential partners.

The theme of the EPS that will be held in Lisbon, Portugal will be related to the following areas: Computational Intelligence, Knowledge Discovery, Knowledge Engineering and Knowledge Management. You can find more information here:

<http://ic3k.org/EuropeanProjectSpace.aspx>

All projects presented at the venue will be invited, after the event, to write a **book chapter** related to the project presentations to be included in a book to be published by SCITEPRESS. This book aims at being an opportunity to disseminate information about the projects presented at the European Project Space.

The European Project Space allows several forms of participation:

- Lease of a booth (2x2m with a table and chair) for distributing information or for demonstration purposes
- Poster Display
- 20 minute oral Presentation
- Demonstration of project results either orally or in other formats

We would like to invite you participate with research projects that are going on, networks of excellence and R&D groups that might be potentially interesting for the European Project Space.

Please submit your expression of interest through this link (<http://ic3k.org/EventProposalEPS.aspx>) until **October 9, 2015**.

We are at your full disposal to answer any question and/or proceed with any action that might be necessary to participate.

We deeply appreciate your attention and we'll be looking forward to your reply.

Best Regards,

Carla Mota

INSTICC "European Project Space" Organizer
